

1628296 - SAProuter Installation Process

Component: BI-BIP (Business intelligence solutions > Business intelligence platform), Version: 7, Released On: 26.04.2023

Symptom

During the lifecycle of an case, customers may want to use SAProuter to allow SAP to connect to their system(s). Please be aware of following points:

- Customers should log an case under component XX-SER-NET-NEW requesting the installation of SAProuter.
- It is the responsibility of the customer to log the case.
- The original case will not suffer any processing delays while the 'SAProuter' case is worked to the standard Service Level Agreement.
- The SAProuter installation can take up to 5 days depending on the customer's availability.
- The original case should NEVER be forwarded to XX-SER-NET-NEW, it must always be a new case handled in parallel with the original case.

Resolution

The SAProuter installation process is documented in the "**Install SAProuter**" page found in the [SAProuter](#) section of the [Connectivity Tools](#).

Follow the instructions in the [Documentation](#) link, review the following instructions: <https://support.sap.com/en/tools/connectivity-tools/saprouter/install-saprouter.html> and share your experiences in the [SAP Community Support forum](#).
